

THE STUDYPRO STUDY SKILLS PROGRAM

The StudyPro curriculum teaches students new tools and strategies for consistent academic success. Attendees build competency in the skills required to become strong and independent learners. This core structure gives students a formula that will help them achieve their potential across all subject matters, for now, and for life.

“Kids are just expected to figure it out and for those who can’t figure it out as quickly, their grades suffer.”

A student’s success won’t come purely from how smart they are, but instead, from the actions they take toward learning. A good study skills curriculum is built to create a “process” for students to become independent learners and help them build habits for success. Internalizing the fundamentals of study - planning, initiating, organizing, time managing and completion - gives students competency in the skills that are key to consistent academic performance.

The core of our program is based on our “Essential Guide to Study Success”. The ten skills taught in this course match what

is being asked of a student in school. Mastering these skills will allow students to effectively manage a rigorous curriculum with greater efficacy and efficiency. The program investigates a child’s awareness of his or her learning strengths and weaknesses, visual and auditory note-taking, memory and test preparation, test-taking and learning from mistakes.

Students gain personalized knowledge of their most effective study strategies. Each student receives a learning style assessment and leaves understanding the most effective study strategies for their unique learning style.

The course is broken in to **five modules** (2 hours each):

1. **Who Am I as a Learner**
2. **Visual Note-Taking**
3. **Auditory Note-Taking**
4. **Memory and Test Preparation**
5. **Test Taking and Learning from Mistakes**

Parents are invited to join their child for the final hour of the session, where students will share their understanding of their learning style and study skills strategies. This provides an opportunity for the child to explain how they will be setting up

their study structure, and the skills they will employ within their new homework routines.

Competency of the skills taught in this program is a requirement for any student in a competitive academic environment where the advanced curriculum demands that students are masters of managing work within and across subjects.

StudyPro helps students develop essential, life-long skills to manage and complete work across subjects and build the competence and confidence to know that they can and will succeed.

LOGISTICS

- The StudyPro Essential Study Skills Course is taught in one-week sessions during the summer and during school breaks as well as on consecutive weekdays and weekends during the school year.
- Students attend 5 two-hour sessions based on their grade level. Course availability is on The StudyPro website under the Programs tab.
- Classes are taught at our McLean, VA location.
- Space in the class is limited to 10 students per grade-specific course.
- Fees cover course materials, personalized learning assessment and instruction.
- Parents are invited to attend the last hour of the last day of class to hear a summary of the skills their student has adopted.
- Due to time and space limitations, no makeup classes will be available.

*Cost per student: **\$850.00***

*A non-refundable deposit of **\$200.00** is due to secure your space in the class and the balance of **\$650.00** is due one week prior to the first day of class. Full payment can also be made during registration.*

ABOUT THE STUDYPRO:

The StudyPro is the only learning center dedicated to improving the study skills and habits of students. Our programs provide a proven, consistent learning model across all subjects. Our “Essential Study Skills Course” is based on 30 years of experience helping students become efficient and effective learners. We work with each student to help them self-assess their learning style and craft a personalized strategy to improve their skills, build their confidence and inspire them to do their best.
